## **Introduction**

This report presents the entries and results for all A-level subject categories for England, Northern Ireland and Wales for the years 2002 to 2010. The data is compiled from the Inter-Awarding Body Statistics produced by the Joint Council for Qualifications (JCQ)<sup>1</sup>. Within each subject category there may be different specifications or indeed different qualifications. For instance, the Mathematics category includes Mathematics, Pure Mathematics, Further Mathematics and Statistics. Where individual subjects are of special interest, these are presented separately: for instance, the Social Science category has been broken down into Law, Political Studies, Psychology and Sociology only and the Modern Languages category into French, German and Spanish only.

The report starts with the entries and results for all subject categories together, followed by each category (or subject) separately. For each, the data are presented in the following order:

- Entries, overall and by gender
- Grade distribution (all candidates)
- Grade distribution (male candidates)
- Grade distribution (female candidates)

There are two tables for each of the grade distributions: the cumulative percentage of candidates achieving each grade by year and the cumulative number of candidates achieving each grade by year.

The latest year in the report (2010) is the first year that the A\* grade has been awarded at A-level. As the report presents data on trends over several years the data relating to the A\* grade (which is for one year only) have not been presented separately. Thus, candidates achieving an A\* are included in the data on candidates achieving a grade A or higher.
